

Ayrshire Sires Identified With Less Than 100% Ayrshire Genetics

The following bulls have been identified as either having semen marketed in the U.S., or having a direct impact on pedigrees of bulls being marketed in the U.S., with less than 100% Ayrshire genetics. The U.S. Ayrshire Breeders' Association works diligently to identify the percentage of Ayrshire genetics for all animals recorded in the U.S. Ayrshire pedigree system. To be recognized for national production awards or to compete in national shows, an animal must be recorded as at least 87% Ayrshire.
